

WE'RE HIRING

Registered Nurse

Making a Difference Through
Personalized, Compassionate Care

Registered Nurses at Harrison play a pivotal role in seamless client care. Nurses are health advocates and champions for our clients providing health coaching to support, motivate and facilitate healthy change. They are an integral part of chronic disease management and preventive healthcare.

WHAT YOU'LL DO:

Provide clinical nursing, client education, and be the first resource for health-related questions and clinical care.

- Document the medical history and lifestyle profile for new clients, and educate them on available services
- Provide recommendations for specific care tracks
- Understand each client's health plan and work proactively alongside clinical colleagues to support and guide the client towards successful outcomes
- Educate clients on their treatment options, self-care techniques, and triage as needs arise
- Coordinate client care and follow-up with the physician, including initiating medications, post-surgical follow-ups, prenatal/postpartum care, chronic disease management, and connecting clients to services in the community
- Perform general nursing duties including well baby checks, immunizations, injections, travel medicine, and physician procedural assistance
- Create and implement protocols as necessary (i.e. health & safety guidelines, emergency management etc.)
